

AUDIT PLUS+

ENHANCING *Energy* AUDITS

We improve energy audit schemes in **energy-intensive industries.**

Practical approach with technical, financial, regulatory and training support for the implementation of energy efficiency measures to meet EU emissions reduction targets.

The Audit Plus Project aims to enhance the sustainability of Energy-Intensive Industries (EII) by guiding them through the implementation of energy efficiency measures, which will offer various energy and non-energy benefits.

3 countries

Ireland

Spain

Poland

3 sectors

- Ceramic
- Fishing & Food processing
- Pharma, chemical & healthcare

EIIs will be provided with an exclusive access to Audit Plus Knowledge Hub, where they will have access to:

- Good practices white book for energy audits
- Dedicated training materials and webinars
- Compilation of available tools for calculating energy and cost savings
- Success stories of implementing energy efficiency measures
- Relevant energy efficiency KPIs to assess energy and cost savings

The energy efficiency consultancy service voucher will guide EIIs through several **energy and cost saving opportunities** in various energy systems and industrial processes including but not limited to:

- Heating, Ventilation & Air Conditioning Systems
- Motors and Drives
- Renewables energy generation
- Lighting
- Building envelope
- Process heating and cooling
- Compressed air system
- Cogeneration and Trigeneration
- Steam generation and distribution system

Audit Plus will offer support related to the following services:

- Technology assessment
- Cost benefit analysis
- Engineering support
- Identification of public and private financing support
- Matchmaking with technology/service providers
- Guidance for implementing energy audit plans
- Developing corporate energy strategies

Objectives

- Establish working groups in 4 different industrial regions of the EU
- Transform available technical and regulatory knowledge into practical insights for stakeholders
- Reduce the energy intensity of industrial processes in the EIIs involved in LIFE Audit Plus
- Bring together regulators, associations, private companies, and technologists to foster new standards and financial schemes to increase investment in energy efficiency measures

Stakeholders Collaboration

- ▶ For EIIs Audit Plus offers an integral energy efficiency consultancy service to guide through energy efficiency measures implementation that will offer several energy and non-energy benefits.
- ▶ For Energy Auditor/Consultant, Technology Provider, Public Authority, we invite you to participate in the operational group and share your experience about barriers and drivers to energy efficiency at EIIs.
- ▶ For the Standardisation Authority, we will liaise with you to create a standard detailing the procedures to be implemented as follow-up of energy audit recommendations and to support the presentation of the after-energy audit plan to European Committees of certification.
